

Advance your Planning & Reporting capabilities by bringing Fabric Data into Solver

Microsoft Fabric unifies data movement, storage, engineering, science, real-time intelligence, and analytics into a single SaaS platform powered by OneLake. With Solver's Fabric Connector, you can extend the value of this unified data foundation by enabling planning, reporting, and analysis directly on trusted, governed data, giving your finance team the insights they need to drive growth.

Transform your business with an end-to-end solution

With our integrated solution, you can:

- Design reports and budget forms in Solver's powerful Excel add-in connected to governed Fabric data
- Create GL, sub-ledger, and operational reports and dashboards with Fabric as your single source of truth
- Facilitate data-driven decisions by aligning financial and operational planning with Fabric's analytics foundation
- Consolidate all your key data sources into Solver for streamlined reporting, forecasting, and analysis
- Automate time-consuming budgeting and forecasting with dynamic, driver-based models powered by Fabric data

Harness your data's potential with Solver's all-inclusive suite

Transform organizational information into a strategic asset by connecting Solver's planning and reporting with Microsoft Fabric. **Manage budgets, automate forecasts, and generate detailed reports**—all on the same unified data foundation that powers your analytics, AI, and Business Intelligence.

Manage budgets

Automate forecasts

Detailed reports

Quickly respond to market shifts by modeling scenarios and running simulations. Enhance prediction accuracy and streamline planning with advanced budgeting and forecasting tools, all connected to governed Fabric data.

Create dynamic “what-if” scenarios

Determine the most effective financial strategies by modeling different scenarios in Solver. Bring in operational drivers from Fabric, such as product, region, or channel, and immediately see the impact on your P&L, balance sheet, or cash flow.

Visualize complex data through easy-to-share graphs and dashboards. By integrating Solver with Microsoft Fabric, insights become accessible across your organization, ensuring finance and operations work from the same single source of truth.
